

Dear Participant,

Etea Sicurezza is glad to invite you to the exhibition "Fire and explosion protection: integrated approach and ultimate technologies"

Etea Sicurezza is an engineering company that operates in the field of Fire and Explosion Protection.

Founded in 1999 as a company specialized in the field of explosion protection, it emerged rapidly on the national and international markets, offering business support and advice for companies operating in different industrial fields such as food & beverages, chemical, petrochemical, woodworking, pharmaceutical, machine construction, etc.

The need to provide a complete service in terms of safety led Etea Sicurezza to expand its activities in the field of fire protection.

The potential of Etea Sicurezza does not end in consulting, but also extends to research and development performed by a skilled team of technicians and engineers. The experience gained over the years allowed the development of fire detection sensors (ETEX) and low pressure water mist system (ETEA MIST). ETEX is a temperature detector suitable for all ATEX zones, while low pressure water mist system is a fixed firefighting systems.

Nowadays Etea Sicurezza works as EPC contractor (Engineering, Procurement and Construction) in the field of Fire and Explosion Protection implementing Safety systems according to the most innovative technologies present in the international market (made in EU or in the USA) which are modified and integrated for the supply of customized systems fully compliant with the customers' needs.

WHERE

The 1st of October at the room F21 from 14.15. to 18.

CONTENT

1. Basic laws on Fire and Explosion hazard
2. Technical rules
3. Virtual simulation of phenomena
4. Zoning
5. Risk assessment
6. Preventive and Protective measures: the ultimate technologies

SPEAKER

1. Dr. Ferruccio Cerruti (Etea Sicurezza Director)
2. Dr. Ilenia Manassero (Fire and explosion protection engineer)
