TIEMS EDUCATION, TRAINING AND CERTIFICATION

With an increasing number of disasters worldwide, resulting in more international collaboration and support to disaster-stricken areas, the need for more education and training in emergency and disaster management seems evident. TIEMS believes that it is important to raise the awareness of the competencies needed in emergency and disaster management, and to support those participating in these activities and operations in acquiring those competencies.

TQC™ & TQAC™ DEVELOPMENT PROCESS

- The idea of a TIEMS International Certification emerged during the **TIEMS 2006 Annual Conference in Korea**
- Around **300 experts** from more than **40 countries** have been consulted during the TQC development process, by answering a questionnaire and participating in three workshops in **Kiev, Manila, and Seoul**; discussing and concluding the TQC concept
- Eight **test candidates** from **7 countries; Australia, China, Jordan, Nigeria, South Africa, India and USA**; have tested the on-line TQC system from A to Z, giving valuable feed-back on the quality, operational aspects, and relevance of TQC; thus, guiding TIEMS to attune TQC to the needs of the international emergency management and disaster response community
- When TQC was launched, TIEMS was soon approached by newly educated professionals, who had proper education but were lacking practical experience in emergency management. TQAC was then established as an additional TIEMS certification for those with proper education in emergency management but was lacking practical experience.

TQC™ & TQAC™ DEVELOPMENT PROCESS

TIEMS International Qualification Certifications (TQC & TQAC) are gaining strong interest worldwide, and 20 candidates from 10 countries are already certified or undergoing the certification process.
