THE INTERNATIONAL EMERGENCY MANAGEMENT SOCIETY (TIEMS) EMERGENCY MEDICAL COMMITTEE

---

## **The Second International Symposium on Emergency Medicine**

### **Proposal**

Guangzhou      March 2015

**Modern Emergency Management System Construction  
Cooperation & Prospect**

## **A: Conference Background**

Recent years, public events happens world-widely, which caused severely devastation to the human beings, properties, social stability, and economic developments. As a result of that, emergency management for the public events has attracted more attention by countries and governments than ever before with the society moving forward. Governments from countries are more focusing on a professional and accurate emergency management system construction with an aim at the precaution and preparation, and meanwhile to optimize and facilitate the construction in the “capabilities within the system” more efficiently. Some developed countries even get emergency management involved in the national overall security strategy and framework, thus to optimizing and reorganizing the system on natural disaster, Human technology accident, national defense, network security, and civil defense, and building a emergency management system covered by the unified leadership, authority, efficiency, and a combination both in the usual and urgent circumstance. For recently century, emergency management had went through the challenges by social and nature disasters, and with the time goes by, disasters are now testing the emergency management systems. Therefore, we have to build with a more complex and more severe range for such a highly and urgently complicate situation, and we need modern emergency management system with more advanced resources and techniques.

The scientific system and regulations are basic condition for any works. Due to a late response to the emergency management, Chinese scientific emergency management construction need to learn the advantages and features from the advanced countries, and help us in a right way under national status. Chinese government have been paid attention to public events since SARS happened, and state council asked the importance of the construction of emergency management system on public events . During APEC meeting in Beijing, in Nov. 2014, Chinese president Xi Jinping emphasized the significance on international cooperation, such as management in public events and infectious disease control. As a result, building a senior international exchange platform will be a benefit for the countries world-widely through discussing and sharing successful experience on the construction of modern emergency management. Furthermore, it works positively on promoting the economic development within the health collaboration field. At the same time, a series of such activities will awake different countries’ governmental more attention to emergency management system construction with investment. As a result, it should be at benefit improving the efficiency in the emergency medicine and good for general people at last.

## **B. Conference Purpose**

1. To provide a good opportunities of exchange and sharing the experience on the construction of emergency management system for policy makers, experts, scholars, and other relevant personnel of emergency medicine from Chinese and other countries.
2. To set up the Emergency Management Branch of China Association for Disaster & Emergency Rescue Medicine.

## **C. Conference Content**

### **1. Forms of the conference**

#### (1) Expert seminar

Inviting some experts from different countries, including Hongkong, Taiwan, Macao and domestic to speech on the topic

#### (2) The participatory discussion

Inviting the emergency medicine policy makers, experts, information operators, rescuer from countries and fields to discuss.

#### (3) Seminars

Lectures and discussions about emergency management system construction and implementation

#### (4) On-site visiting

Visiting the emergency management system construction of Guangdong Provincial Emergency Hospital

### **2. Conference Subjects**

- (1) The conference focus on the latest trend of the emergency management construction domestically and internationally

(2) To set up Conference of the Emergency Management Branch of China Association for Disaster & Emergency Rescue Medicine.

(3) The meeting of the Emergency Management Branch of China Association for Disaster & Emergency Rescue Medicine and the International Emergency Management Society Emergency Medical Committee, discuss the working plan for next year.

### **C .Including Contents**

(1) Understanding the law of China Emergency Management (Chunchang Shan. The counselor, and the team leader of China State Council Emergency Response Expert Group)

(2) The strategy of the development of Chinese earthquake disaster emergency rescue (China Earthquake Emergency Rescue Bureau )

(3) Chinese Emergency Medicine construction and current implementation. (Emergency Response office Ministry of Health )

(4) Retrospect and Prospect of the China Emergency Medicine Management System. (Zonghao Li, Duty president of China Association for Disaster & Emergency Rescue Medicine)

(5) Developing trend of international emergency management system (K Harald. Drager, president of the International Emergency Management Society)

(6) Disaster & Earthquake and Medical Resources Arrangement Strategy (Guosheng Qu, vice president of the International Emergency Management Society, vice-captain of China National Rescue Group)

(7) Introductions of different countries on the construction of emergency medicine management ( experts from American, England, Germany, Italy, Israel, Sweden, Ireland, Australia, Canada, Holland, South Asia and other related countries, including Hongkong , Macao and Taiwan areas)

(8) Current circumstance of the construction of Emergency Medicine Management System in Guangdong province( Junzhang Tian, the commissioner and the director of Guangdong provincial medicine & disaster branch committee, president of Guangdong Provincial Emergency Hospital)

(9) Introduction about the experience on the construction of emergency management system from Chinese relevant experts, authorities, top hospital presidents within the emergency medicine field. ( 10 Chinese commissioners from The International Emergency Management Society Emergency Medical Committee, 20 representatives and also the initiators from Emergency Management Branch of China

Association for Disaster& Emergency Rescue Medicine at least).

#### **D. Organization and Management**

**Support Unit: The International Emergency Management Society**

**China Association for Disaster & Emergency Rescue Medicine**

**Emergency Management Office in Guangdong Province**

**Health and Birth Control Community in Guangdong Province**

**Host Unit: The International Emergency Management Society Emergency Medical Committee**

**Guangdong Medical Association**

**Organizer: Branch Committee of Medical & Disaster of Guangdong Medical Association**

**Guangdong Provincial Emergency Hospital**

#### **E. Ceremony Speech**

Chunchang Shan	The counselor, and the team leader of China State Council Emergency Response Expert Group
K Harald. Drager	President of the International Emergency Management Society
TBD	The United Nations Development Program (UNDP) representative office, China
Zonghao Li	Deputy president of China Association for Disaster& Emergency Rescue Medicine
Jiaqi Ji	Director of Guangdong Provincial Emergency Management Office
Ran Chen	Director of The International Emergency Management Society Emergency Medical Committee Director of Emergency Management Branch of China Association for Disaster & Emergency Rescue Medicine
Guoyin Li	Secretary-general of Guangdong Provincial Medical Association

## **F. Participants (Nearly 200)**

1. Authorities, experts and scholars of emergency medicine field in China
2. Representatives and also the initiators from Emergency Management Branch of China Association for Disaster & Emergency Rescue Medicine
3. Related Commissioners from The International Emergency Management Society and Medical Committee.
4. Related international experts and scholars in the field of emergency management system construction
5. Related national and foreign emergency medicine rescue specialists

## **G. Conference Address**

1. Conference Address: Guangzhou, Guangdong Province
2. On-site visiting: Guangdong Provincial Emergency Hospital
3. Accommodation standard: No less than 4 star hotel

## **H. Conference Date**

1. Conference Date: Full day meeting on the 28<sup>th</sup> March 2015, and visiting in the morning on 29<sup>th</sup> March and meeting dismiss on 29<sup>th</sup> March in the afternoon.
2. Registration: 27<sup>th</sup> March, 2015 8:00-24:00
3. Conference Schedule : Throughout 28<sup>th</sup> March, 2015 (Detailed schedule on page 9-13)
4. On-site visiting: To visit the Guangdong Provincial Emergency Hospital and Guangzhou Community based on the demand of conference participants
