

## **Sharmila Gurung Answers to TQC Certification Questions**

### **1. What brought you into the Emergency / Disaster Management field?**

My journey into the Emergency/Disaster Management field has been shaped by a blend of personal passion, professional expertise, and a deep-rooted commitment to humanitarian action. Beginning with my early engagement in post-earthquake relief efforts with Jay Nepal Action Volunteers, I developed a profound sense of responsibility towards helping communities navigate through crises. This hands-on experience laid the foundation for my subsequent roles, including providing technical support for forensic programs at the ICRC, where I worked tirelessly to ensure the dignified management of the deceased in conflict and disaster settings. Pursuing academic studies, such as a Master's in Forensic Archaeology and certificate course on Forensic Anthropology, and continuously seeking certifications in disaster response and psychological support, have been pivotal in sharpening my skills and knowledge in this field. Additionally, working in international settings and collaborating with diverse stakeholders have broadened my perspective on effective disaster management strategies. Overall, my journey reflects a deeply ingrained desire to utilize my expertise to make a meaningful impact in mitigating the effects of disasters on individuals and communities.

### **2. What attracted you to the TIEMS organization and the TIEMS TQC & TQAC certification?**

TIEMS caught my attention because of its focus on improving emergency management worldwide. With my background in disaster response and forensic expertise, I see TIEMS as a valuable platform for sharing knowledge and best practices. The TQC & TQAC certifications offered by TIEMS align perfectly with my commitment to ensuring high-quality disaster responses. Pursuing these certifications will not only enhance my skills but also allow me to contribute to global efforts in emergency management, benefiting communities in need.

### **3. How do you think the TIEMS TQC certification will benefit your future opportunities and career?**

The TIEMS TQC certification will benefit my future opportunities and career by showcasing my dedication to excellence in emergency management. It will enhance my credibility and proficiency, making me a stronger candidate for leadership roles and consulting opportunities. Additionally, it will connect me with a global network of professionals, fostering collaboration and knowledge exchange. Overall, this certification will enable me to make more significant contributions to disaster response efforts, ultimately advancing my career in the field of emergency management.

### **4. How was your experience with navigating through the TIEMS TQC & TQAC certification process?**

Navigating through the TIEMS TQC & TQAC certification process was straightforward and fulfilling. The guidelines were clear, and the support provided by the board members made the process smooth. Studying the materials was insightful. Overall, it was a positive experience that enhanced my knowledge and skills in emergency management.

**5. In your opinion, how does the TIEMS TQC certification compare to other Emergency Management certifications?**

In my opinion, the TIEMS TQC certification stands out because it covers a wide range of emergency management topics and emphasizes maintaining high standards. Unlike other certifications that focus on specific areas, TQC provides a comprehensive understanding of disaster prevention, response, and quality assurance. Unfortunately, this type of certification isn't available in Nepal, making it a unique opportunity for professionals in the country. Overall, TIEMS TQC certification offers valuable skills for those looking to excel in emergency management.

**6. In light of Covid-19 and the war in Ukraine, where do you see the Emergency / Disaster Management field heading?**

With Covid-19 and the conflict in Ukraine, the Emergency/Disaster Management field is likely to focus more on improving public health preparedness and humanitarian response. There will be a greater emphasis on healthcare infrastructure, vaccine distribution, and crisis communication for future pandemics. Additionally, efforts to address the immediate needs of displaced populations and protect civilians in conflict zones will be crucial. Overall, the field will evolve to address the interconnected challenges posed by these crises.

**7. Is there anything else you like to tell about yourself?**

I am deeply dedicated to humanitarian work and thrive in fast-paced environments. Making a positive impact in emergency management is my passion.
